

Beverly needs foster homes!

Today, like every day, approximately 5- 10 children will come into the custody of The Department of Social Services in the Salem office alone. Kids who go to schools and churches and live and play right here on the north shore. It's a frightening experience for a child to suddenly be removed from everything and everyone they know. If more foster homes were available in this area, then children could at least remain in the same schools, and still be able to see their friends, teachers, and relatives.

These kids need loving, nurturing families who will open their homes. If you might be interested in caring for children and teens who are deserving of a safe, loving home, please call Carla King for more information about foster and adoptive parenting.

Foster parents receive ongoing support from the Salem office, MSPCC, and local support groups.
